**(54) UMBRELLA STORAGE  
CASE FOR AUTOMOBILE**

## (57) Abstract:

**PURPOSE:** To drain the water inside the umbrella storage case storing a wet umbrella outside a car by connecting an extended conduit pipe to the tip of the main body of an umbrella storage case and arranging the conduit pipe so as to lead it outside a car through the gap of the door lower part.

**CONSTITUTION:** This umbrella storage case has the main body 1 formed in about a conical cylindrical shape capable of storing a wet umbrella, a projection hole(drain hole) 2 is formed at the tip of the main body 1 and an extended drain pipe 3 consisting of a freely bendable material is connected to this projection hole 2. The main body 1 of this umbrella storage case is arranged at the adequate position of the automobile door internal lining and after the extended drain pipe being run along the door internal lining arranged the exterior through the door bottom part from the door lower part gap. The water dropped from a wet umbrella can be collected to the tip side of the

main body 1 and drained to the exterior through the extended drain pipe 3.
